23. Problem: (use additional Sheets if necessary) Update to the IRIX 6.5.14 patch map are needed. One unneeded patches was removed in the installation and therefore needs to be removed from the baseline patch map. Other patches that were baselined separately as hardware-dependent patches, can be added to this common bundled as they are specific to all SGI Challenge machines and all Origin machines respectively. Therefore these can be baselined (and audited) as common for the respective machine type.						
24. Proposed Solution: (use additional sheets if necessary) Update the IRIX 6.5.14 patch baseline as identified in the revised 911-TDA-005 document, Rev. 03.						
25. Alternate Solution: (use additional sheets if necessary) Inconsistent Baseline						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) Inconsistent Baseline						
27. Justification for Emergency (If Block 15 is "Emergency"):
